Your Manufacturer and Master Distributor for Physiotherapy, Sports & Fitness Products

Version 2021/10

We are proud to present to you our new catalogue 2021-2022!

Since 1996, our company has been known as a worldwide manufacturer and master distributor of a broad range of physiotherapy, rehabilitation and sports & fitness products. Our products reach the end-users through a global network of dealers and distributors.

Our own branded MoVeS and Mambo Max products, as well as other well-known brands in our market, are all presented in this catalogue.

On page 7, you can find our new products: our MoVeS Kinesiology Tape, Mambo Max Balance Pad Pro, and our updated MoVeS PearlPack Sport Pack with strap.

All our medical devices, marked with the MD symbol, comply with all the requirements of the EU's Medical Devices Regulation (MDR), which came into force May 26, 2021.

For all your inquiries for Private Label products, please contact us. We will be happy to assist you working out your private label projects.

Unfortunately, Covid-19 is still around, which has made 2021 a challenging year as we are currently experiencing the economic impact of this pandemic. Shortages of raw materials & containers as well as available vessel spaces cause high product price and transport price increases, as well as many and long delays on deliveries. We have adapted our systems to this present-day reality to minimise stock shortages.

This year is also special in the company's history; I herewith take the opportunity to introduce you to the new owners. It is with great confidence that I hand over the company to Evelyn and Tom, who will continue in the same spirit and with enormous enthusiasm. I wish them lots of success!

Finally, I would of course like to thank YOU for your confidence in the company and its products!
Stay safe, stay healthy!

Sincerely,
Sandra Vrancaert

OUR OWN BRANDS

MoVeS products are aimed towards physiotherapy and rehabilitation, predominantly resistive exercise. Resistive exercise products have various levels of resistance, which also makes them perfect for fitness. MoVeS products are generally MD certified.

Our Mambo Max products are the go-to-products for wellness, fitness and strength training at an affordable price tag. Combine various products for a complete work-out, without leaving your home.

THE ENVIRONMENT

We, at MVS In Motion, continue our strive to reduce our carbon footprint on the planet. Because after all, there is no planet B!

By making exercises available on our websites, not only do we reduce our ecological footprint by cutting down on the number of unused prints, it also allows us to keep costs low and offer you better value-for-money.

DOWNLOAD

We have also been making continuous efforts over the past years to replace our plastic packaging with the more eco-friendly and recyclable cardboard packaging. And we will continue these efforts in the future!

MoVeS

MoVeS F!T

LEADER IN TECHNOLOGY

What is Snap-Stop®?

Snap-Stop® makes exercising with latex bands much safer. This unique feature will avoid sudden snapping, even if there's a cut or puncture. When working out with a resistive exercise band, the band has to endure extremely high forces. A small cut can have a big consequence...

MoVeS and MoVeS F!T Bands are unique in their field. Thanks to our extensive research and development we have achieved an innovative production process: when used properly, the latex band will not suddenly snap, even when exposed to high forces. This does not apply to a very old band, or band that has been exposed outdoors for some time, as well as an abused band. Using a fresh and clean sheet of band is recommended.

Snap-Stop® for safer resistive exercising.

See for yourself

One-Stop-Shop for all your bands and tubes

MVS In Motion is your one-stop-shop for all resistive exercise products. With MoVeS we offer both original colour and F!T colour sequence. In addition, we offer a wide range of Latex-Free resistive exercise bands in original colours. Our tubes and loops are also available in the original and F!T colour sequence.

The latex bands, tubes and (super)loops are made of high quality latex from huge rubber tree plantations in Malaysia. All products have an extraordinary elasticity and linearity. The Snap-Stop® feature on our latex bands, dipped production process for our tubes and the multi-layered structure of our (super)loops makes them your ideal partner for your physiotherapy trainings or intensive work-outs. The different resistances allow you to use MoVeS for rehabilitation as well as for fitness.

MoVeS Latex-Free is made from TPE, to the same high quality standards as the regular MoVeS bands. Never before were the characteristics from Latex-Free bands so close to those from their latex counterpart.

MoVeS Band: 8 resistances (Tan - Gold) & 5 lengths (1,5m - 2,5m - 5,5m - 22,5m - 45,5m)
MoVeS F!T Band: 6 resistances (Peach - Grey) & 4 lengths (1,5m - 2,5m - 5,5m - 45,5m)
MoVeS Latex-Free Band: 5 resistances (Yellow - Black) & 3 lengths (1,5m - 5,5m - 45,5m)

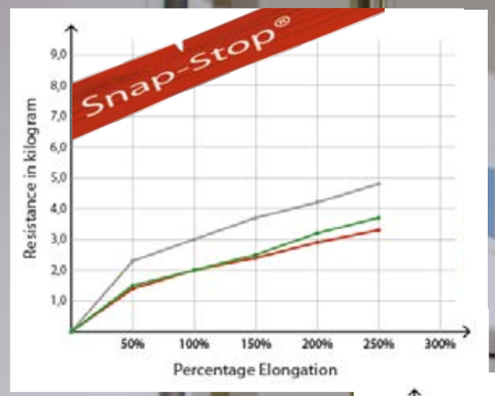
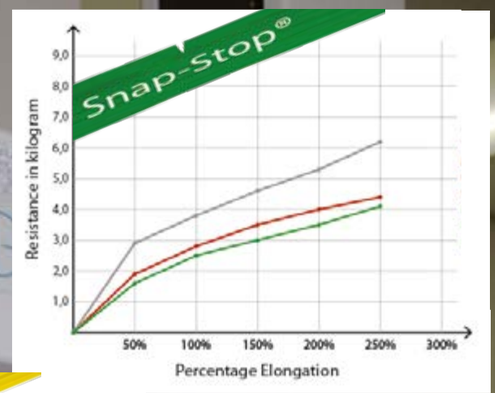
Blueberry	Extra Heavy
Plum	Special Heavy
Grey	Super Heavy

- Well-known colours used by physiotherapists all over the world
- Packaging with two tone layout brings more variety
- MoVeS brings premium quality to an affordable price range.

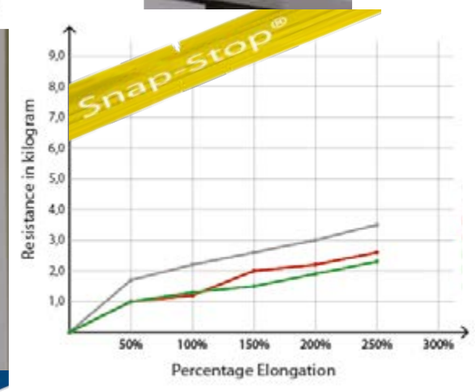
- "F!T"- colours are more trendy and youthful than original colours, reaching out to a wider customer base such as athletes and home users
- Sell MoVeS F!T next to MoVeS to widen customer base = EXTRA SALES

Resistance - MoVeS Band vs. Market Leader





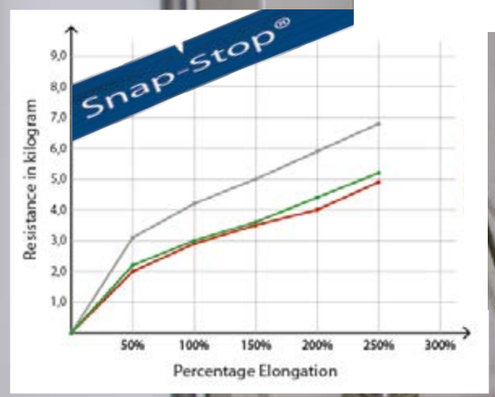
Light
Medium
Heavy
Extra Heavy
Special Heavy

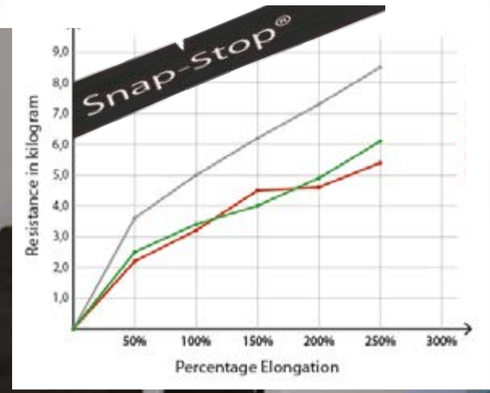


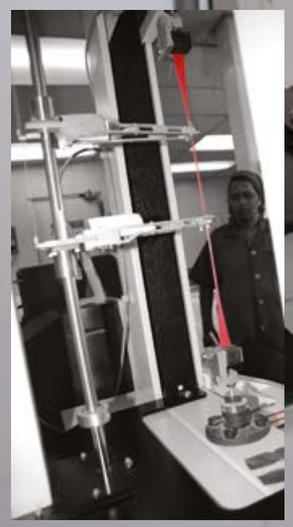
Market Leader:
Some non-linear behaviour + green and blue are almost identical

MoVeS Band:
Best combination of resistance / linearity

Other alternative:
Very high resistance







MoVeS Bands can be stretched up to 600% elongation! MoVeS Bands are therefore your perfect partner for a rehabilitation programme or a full body work-out. Even after an effective training with amazing results, MoVeS Bands allow you to use the same band again. When you pre-stretch your band, you will be able to achieve higher forces without having to worry about the 'elastic stop', the point where the band feels like a regular string. Most competitor's bands are not to be stretched more than 3 times their resting length, while a MoVeS Band achieves easily the double, maintaining its amazing elasticity.

These specifications apply to all MoVeS resistances. The high-quality material enables you to have a much wider array of resistances and possibilities compared to the competitors. At the start of your exercise, the band already gives some resistance, which allows you to achieve much better results than when the band is at its resting length.

Note:
- 50% elongation = 1,5 x lay-flat length
- 100% elongation = 2 x lay-flat length
- 150% elongation = 2,5 x lay-flat length

MoVeS Band

MD CE

MoVeS Bands are premium quality, low powder (in fact, less than 2mg/dm², so we're officially powder-free) latex resistive exercise bands. The unique Snap-Stop® fabrication process makes this product extremely tear resistant. Using the MoVeS Bands for resistive exercises provides positive as well as negative forces on the muscles and improves the range of motion, the strength and the cooperation of the muscle groups. The 8 different resistance levels are determined by the thickness of the band. MoVes bands are available in 5 lengths and come with a full colour manual. The band has a width of +/- 127mm.

Dispenser	25 bands of 1,5m in a nicely designed OTC dispenser box. Each band comes in a separate polybag.
1,5m	10 pre-cut bands of the same resistance or 5 pieces of different resistance (yellow, red, green, blue and black). Each band comes in a separate polybag with header and barcode.
2,5m	10 pre-cut pieces of the same resistance or 5 pieces of different resistance (yellow, red, green, blue and black). Each band comes in a separate polybag with header and barcode.
5,5m	One small roll of our premium band.
22,5m	One medium roll of our premium band.
45,5m	One large roll of our premium band.

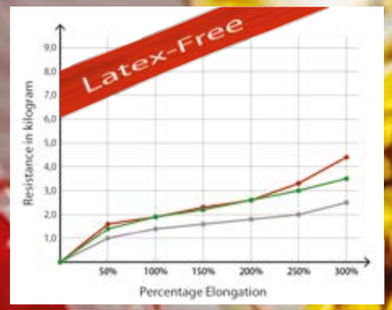
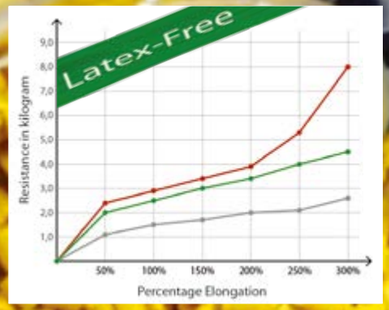
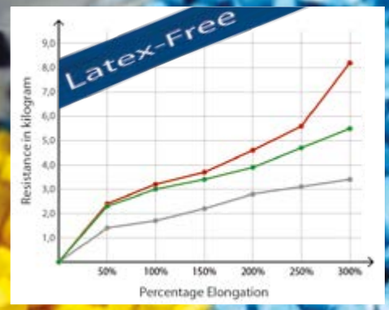
Resistance - MoVeS Latex-Free Band vs. Market Leader

Research and development is high on our list for MoVeS products. As an example, these continuous efforts have brought us the Snap-Stop feature for the regular MoVeS Band.

Now, we have improved our Latex-Free Bands. The MoVeS Latex-Free Band has been optimised by using an innovative mix of raw material. Following customer demand, the grip has been improved.
Resistance levels are similar to the 'old' latex-free band.







MoVeS Band:
Best combination of resistance / linearity

Market Leader:
Non-linear behaviour

Other alternative:
Very low resistance

We are confident that MoVeS Latex-Free Bands are one of the best latex-free resistive exercise bands on the market. The elasticity and linearity are simply amazing. Finally people who don't support latex can exercise with the same high quality specifications. MoVeS Latex-Free bands start from high quality thermoplastic elastomer (TPE), so it's non-toxic and completely PVC and phthalate free.

The linearity from how the strength per elongation evolves is one of the most important specifications as it offers the possibility to apply a very extended range of exercises without risking an injury due to strange unexpected product behaviour. Latex-free alternatives will reach their 'elastic stop' more quickly; this is the point where the band feels like a regular string.

We notice a growing demand and trend for latex free products. For instance, more and more hospitals and centers aim to be completely latex free to avoid possible allergic reactions for their patients or staff. After extensive research and development, we were able to launch our MoVeS Latex-Free Bands. A product which we are extremely proud of.

MoVeS Latex-Free Band MD CE

Thanks to our technological leadership, we achieve a Latex-Free exercise band with characteristics that were never before so close to its latex counterpart. With an exceptional 'resistance vs. elongation' linearity, we are confident our MoVeS Latex-Free Band is the best product to fulfil your needs.
The 5 different resistance levels are determined by the thickness of the band. These bands are available in 3 lengths and come with a full colour manual. The band has a width of +/- 100mm.

1,5m	10 pre-cut bands of the same resistance or 5 pieces of different resistance (yellow, red, green, blue and black). Each band comes in a separate polybag with header.
5,5m	One small roll of our latex free band.
45,5m	One large roll of our latex free band.

MoVeS Tube

MD CE

The MoVeS Tube is a high quality tube created by an intensive dipping process. The dipping process guarantees a multi-layered tube, which ensures a strong and safe training product. Extruded tubes are very susceptible to damage and can easily snap, this is not the case for our multi-layered dipped tubes. In general, dipped tubes are even more durable than bands, especially when used on a coarse surface.

MoVeS Tubes are available as a ready to use product - 120cm length with handles straight out of a polybag - and in rolls - 7,5m or 30m packed in a nicely designed box.

The table below shows the exceptional strength to elongation linearity from our tubes.

COLOUR	TOTAL KG / ELONGATION %					
	50%	100%	150%	200%	250%	300%
Yellow	1,0	1,5	1,9	2,3	2,9	3,6
Red	1,4	2,0	2,5	2,8	3,4	4,0
Green	2,4	3,4	4,0	4,9	5,5	6,5
Blue	2,9	3,9	4,7	5,6	5,9	7,4
Black	3,4	4,4	5,4	6,2	7,1	8,1
Silver	4,0	5,4	6,5	7,7	8,1	9,5

Combine a roll with our Safety Handles for superior grip (p22).

MoVeS Tubes with Handles are very useful for physiotherapy and muscle training. These high quality and very resistant tubes are created to train all muscles in your body and improve body flexibility. The lighter resistances are perfect for physiotherapy or a light work-out, while the highest resistances will even convince the more trained athlete.

DIPPED not extruded

Box with Rolls

MoVeS Wide Loop

MD CE

We offer wide loops (7,5cm) next to our regular loops (2,5cm) with the same resistances. Some users may prefer the wider loops for spreading the forces more evenly on their body parts, while others prefer the thicker narrow loops which won't roll-up while being stretched.

As your supplier for bands, tubes and loops, these wide loops fit perfectly in our range of resistive products to satisfy all users. Wide loops are also multi-layered and available in 6 resistances: from Extra Light (Tan) to Special Heavy (Black).

MoVeS Wide Loops:
High quality, cost effective and easy to use!
Lay-flat-length: 30cm
Width: 7,5cm
One unit contains 10 individually packed pcs of the same colour/resistance

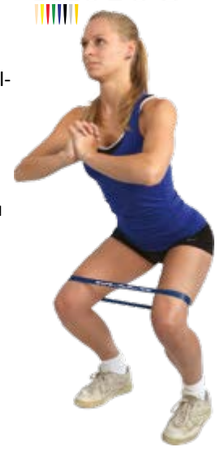
MoVeS Loop

MD CE

MoVeS Loops are extremely portable and unbelievably versatile products. They are very effective instruments for stretching and strengthening all muscle groups.
The MoVeS Loop Set really is a "Gym on-the-go".

Our loops are also multi-layered which results in a more durable product. These thicker loops won't roll-up during exercising, avoiding the uncomfortable feeling from thinner alternatives.



They are available in 6 resistances: from Extra Light (Tan) to Special Heavy (Black).
The loop set combines our most popular colours in a compact mesh bag. This affordable set is very useful to bring along wherever you go.

Made in Malaysia

The production of MoVeS latex products start deep in the humid forests of Malaysia, where the best and strongest trees provide the natural latex rubber that will be processed from a milky fluid to your preferred resistive exercise band. When a tree is 5 - 6 years old, harvesting can begin: incisions are being made orthogonally in the bark of the tree, just deep enough to tap the latex vessels without harming the tree's growth. The fluid is collected in small buckets, a process known as rubber tapping.

natural **100%** biodegradable

"This is why we are confident when using the words 'premium quality' when referring to MoVeS."

Only the best quality latex is being selected for MoVeS Bands. Production starts under the constant supervision of a team of scientists, ensuring an immaculate product quality.
Latex sheets are produced, powdered, washed, dried and cut to the exact width. The amount of powder used is below the 2mg/dm² limit, which makes the MoVeS Bands officially powder-free. Each batch of latex sheeting that is produced, is subject to the meticulous inspection of our scientists by a series of laboratory experiments: colour-coding, dryness, tensile strength, tearing resistance, snapping resistance, …
During the rolling process, a 100% visual inspection is being conducted on both sides of the band. Indeed, before leaving the factory, every MoVeS product has been completely analysed, checked and examined to ensure premium product quality.

Did you know that rubber trees combat greenhouse gases and thereby slowing down global warming? Additionally, latex harvesting helps prevent deforestation.

MoVeS F!T Band MD CE

MoVeS F!T, for athletes and home use.
MoVeS F!T Bands are low powder (in fact, less than 2mg/dm², so we're officially powder-free) latex resistive exercise band with the same premium quality as the original MoVeS Bands. The difference is purely the alternative, more youthful colour sequence. The band comes in 6 different resistance levels which are determined by the thickness of the band, is available in 4 different lengths and comes with a full colour manual.

COLOUR	TOTAL KG / ELONGATION %					Compares to STANDARD

MoVeS F!T Tube

MD CE

The MoVeS F!T Tube is a high quality tube created by an intensive dipping process. The dipping process guarantees a multi-layered tube, which ensures a strong and safe training product. Extruded tubes are very susceptible to damage and can easily snap, this is not the case for our multi-layered dipped tubes. In general, dipped tubes are even more durable than bands, especially when used on a coarse surface.

MoVeS F!T Tubes are available as a ready to use product in 30m rolls, packed in a great dispenser box. Safety Handles offer an unlimited amount of exercises and superior grip.

MoVeS F!T Tubes are available in 6 different colours. The table below shows the resistance and to which standard colour it relates.

COLOUR	TOTAL KG / ELONGATION %					Compares to STANDARD
	50%	100%	150%	200%	250%	
Peach	1,0	1,5	1,9	2,3	2,9	Yellow
Orange	1,4	2,0	2,5	2,8	3,4	Red
Lime Green	2,4	3,4	4,0	4,9	5,5	Green
Blueberry	2,9	3,9	4,7	5,6	5,9	Blue
Plum	3,4	4,4	5,4	6,2	7,1	Black
Grey	4,0	5,4	6,5	7,7	8,1	Silver

Box of 30m contains maximal 3 separate pieces.
Minimal length of 1 piece is 4m.

COLOUR	RESISTANCE	MOVES F!T TUBE 30m roll

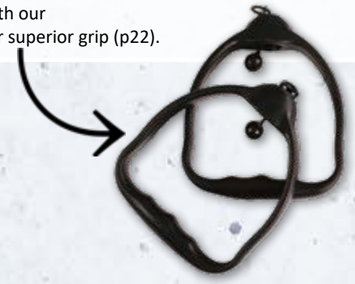
Grey	Super Heavy	01-213007

Combine a roll with our
Safety Handles for superior grip (p22).



MoVeS F!T Loop

MD CE

Your
Gym on-the-go

Our high quality and cost effective loops are also available in F!T colours. MoVeS F!T Loops are easy to use and very versatile. You can stretch and strengthen all muscle groups.

Our loops are multi-layered, this results in a more durable product. Our thicker loops won't roll-up during exercising, avoiding the uncomfortable feeling from thinner alternatives.

Our loop set combines our most popular colours in a compact mesh bag. This affordable set is very useful to bring along wherever you go.

MoVeS F!T Loops:
High quality, cost effective and easy to use!
Lay-flat-length: 30cm
Width: 2,5cm
One Polybag contains 10 loose pcs

Multi-Grip Exerciser MD CE

The Multi-Grip™ Exerciser is designed to provide unlimited exercise options to users who want to do various high impact performance exercises. Each exerciser contains both large and small loops that are easy to grip. Use the small loops as an anchor or for finger exercises. Use the larger loops around the hands and feet to perform high impact upper and lower body exercises. Easily change resistance by moving 1 loop up or down the exerciser, or using a different resistance progressively exercise with 8 different colour-coded resistance levels.

The Multi-Grip™ Exerciser is made of an unscented cloth that can be washed and dried. It does not contain latex or a powder coating.

MoVeS Knee Rope Pulley

MD CE

The MoVeS Knee Rope Pulley helps increase range of knee motion. This easy-to-use product can be mounted in a doorway to help you recover from or prevent knee injuries.

While sitting on a chair, put your foot into the ankle strap. A rope starts from the ankle strap, goes through a pulley and ends at a wooden handle designed for a 2-handed grip. Pull your foot carefully upwards by moving the handle towards your abdomen which will generate a rotational movement at your knee.

The rope length can easily be adjusted at the handle while a print on the ankle strap helps you to secure your foot in the right position. The MoVeS Knee Rope Pulley comes in a full colour cardboard packaging with a pulley, wooden 2-handed handle, ankle strap, nylon cord and door anchor.

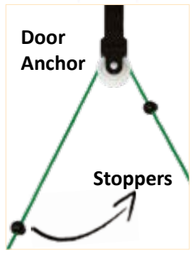
MoVeS Shoulder Rope Pulley - Door Anchor

The MoVeS Shoulder Rope Pulley is an economical, easy-to-use device that helps increase range of shoulder motion. It can be used for prevention and rehabilitation of shoulder injuries. This easy to use shoulder rope pulley can be mounted in a doorway.

Notch Handles

MD CE



This MoVeS Shoulder Rope Pulley comes with a pulley, door anchor, nylon cord, stopper system and notch handles.
The unique notch handles allow the user to easily adjust the length of the rope through the handle while the revolutionary stopper system is a great aid for consistent and progressive exercising.

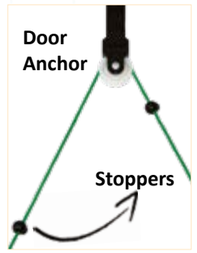
Value-Pack

CE

The VALUE PACK is packed in a polybag, with notch handles but without stoppers on the nylon cord.

Wooden Handles

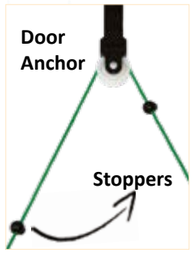
MD CE



This MoVeS Shoulder Rope Pulley comes with a pulley, door anchor, nylon cord, stopper system and wooden handles.

Hand Support

MD CE



This MoVeS Shoulder Rope Pulley comes with a pulley, door anchor, nylon cord, stopper system and detachable hand support.
This hand support allows patients without gripping power to use the shoulder pulley.

MoVeS Flex-Ion MD CE

The spring loaded buttons of the MoVeS Flex-Ion isolate each digit, so the strong fingers cannot compensate for the weaker ones. This results in a better, faster and easier to control rehab process. MoVeS Flex-Ion is available in 6 colour coded units with gradual resistance. This gradual resistance helps the therapist measure progress. The ergonomic base adds comfort and stability. Comes with a full colour and multilingual instruction manual.

Comes in 6 different colours/resistances

Digi-Extend MD CE

The Digi-Extend® is a unique therapy device that can isolate the extension of all five fingers and each of the individual finger joints. The product strengthens the intrinsic and extrinsic muscle groups to maximise extensor tendon gliding, joint motion, coordination and muscle function in the hand and forearm.

The Digi-Extend® focuses on the extensor mechanism of one or all fingers as it targets the area of the hand that needs rehabilitation. Patients can easily change the resistance levels and vary their hand positions for specific exercises to help maximise the exercise goals and prevent injury. The Digi-Extend® can also be used for finger adduction, abduction, blocking and flexion exercises. It is compact in design, high-tech, easy and comfortable to use as well as effective in helping patients reach their therapy goals. Four colour coded band resistance levels allow each muscle or joint to work at a comfortable level and build as increased strength is achieved.

Constant Force X-Tend CE

Unlike elastic-based exercisers that increase in resistance the further the unit is extended, Constant Force X-Tend uses retractable-based resistance, which keeps a constant level of resistance from start to finish.
Ergonomic in design, the Constant Force X-Tend works the Intrinsic and Extrinsic Extensors of the hand and can isolate MP/PIP/DIP joint motion.
It also allows each finger to exercise independently with smooth, consistent resistance, thus improving range of motion, endurance, strength and dexterity more effectively.

- Exercise each finger or thumb independently with smooth, consistent resistance to the intrinsic and extrinsic extensor muscles throughout their full range of motion.
- Improve range of motion, strength, dexterity, endurance, circulation for each finger as well as the hand, wrist and forearm.
- Ergonomic design fits comfortably in hand, and includes ability to isolate pip & dip joints.

COLOUR	RESISTANCE (per digit)	REFERENCE	UNIT

Varigrip Therapy CE

Resistance adjustable per finger

The VariGrip Therapy has the ability to adjust tension in each individual finger, the resistance from each single finger knob can easily be adjusted. Resistance can be increased incrementally on the patient's need, which minimises over-compensation and strain. The VariGrip allows the patient to progress steadily between resistance levels.
5 different resistance levels are available.

Comparison Chart: VariGrip vs Digi-Flex® / Flex-Ion (kg per digit)

VariGrip	X-Light		Light		Medium		Heavy		X-Heavy	
Digi-Flex® / Flex-Ion	0,7	1,4	1,4	2,3	2,3	3,2	3,2	4,1	4,1	n/a

Each Varigrip's highest resistance ends where the next VariGrip resistance starts. Any other hand exerciser increases from Light (1,4kg) to Medium (2,3kg). That's almost a 70% increase gap, which can cause an overload on the muscles, resulting in injuries. The seamless progress from one VariGrip to the other, supported by the padded finger and palm area, guarantees a safe recovery and better feel for those with sensitivity issues.

COLOUR	RESISTANCE (range per digit)	LEVEL	REFERENCE	UNIT
X-Light	0,7kg - 1,4kg	1	02-100102	1 pc

Varigrip Uno CE

Soft touch thumb button

Both flexion and extension

The only thumb/individual finger exerciser with adjustable resistance for both flexion and extension. An ergonomic design with stabilisation points offers extra support.

Gradually adjust resistance and better track progression based on the patients needs. Benefits are improved strength, dexterity, endurance and range of motion.

Light Spring	0,7kg - 2,3kg
Heavy Spring	2,3kg - 3,6kg

The VariGrip Uno includes two easily interchangeable springs.
The red spring allows a light resistance for early therapy or light training. Once a higher resistance is required the red spring can be swapped by the green spring, allowing a higher resistance.

Adjustable resistance allows a smooth transition between resistance levels

MoVeS Squeeze Balls & Eggs MD CE

The MoVeS Squeeze Ball is developed to provide a progressive sequence of 5 colours. It strengthens hands, fingers, forearms and will work the muscles separately or in tandem. The MoVeS Squeeze Ball can be used for rehab as well as for sports training or stress relief.

The MoVeS Squeeze Egg is ergonomically shaped to provide highly effective exercise for the rehabilitation and strengthening of weakened or injured fingers, hands and wrists. Because it is small and easy to use, you can exercise anywhere, anytime.

Available colours/resistances: yellow, red, green, blue and black.

The MoVeS Squeeze Balls & Eggs can help to:
- Rehabilitate post-operative/post-traumatic hands and arms.
- Restore function in hands, arms and shoulders following stroke.
- Reduce pain and stiffness in arthritic fingers, hands and wrists.
- Relax tense, sore muscles and reduce stress.
- Strengthen aging hands and arms.

Why Anti-Microbial Agents?

Anti-microbial agents kill bacterium without additives and resist growth of odour-causing microbes. MoVeS Comfort Putty contains natural anti-microbial without addition of toxic chemicals. This additive ensures the MoVeS Comfort Putty material retains the clean, non-greasy feel from day one. Cheaper alternatives on the market do not contain these agents. As a small amount of bacteria and other micro-organisms will always be present on the patient's hands and because putty should be stored in room temperature conditions, anti-microbial agents are a must to avoid the putty becoming the ideal breeding ground for bacteria and fungi. Anti-microbial agents extend the product's lifespan and improves its cleanliness.

MoVeS Comfort Putty

The MoVeS Comfort Putty does everything a great putty should do: it strengthens weakened grasp through exercise and is used for rehabilitative exercise or stress relief. It is odourless, does not stain and will not leave any residue on the patient's hands. MoVeS Comfort Putty is non-toxic, greaseless, hypo-allergenic and gluten and latex-free. MoVeS Comfort Putty is available in 6 colours/ resistances and comes pre-packed.

Saehan Cycle CE

03-010301: Saehan Cycle - Home

The Saehan Cycles are pedal exercisers aimed at increasing strength and flexibility.
Both the Home and Clinical Saehan Cycles include attachments to fit the pedal exerciser to a chair or even a wheelchair. The pedal exerciser's length can be perfectly adjusted to the user when his feet are fitted in the pedals with foot straps. A convenient turning knob makes it possible to adjust the resistance (0 - 13 kg) which increases or decreases the effort, resulting in a progressive exercise programme.

The Clinical version from the Saehan Cycle has an even higher level of adjustability. The distance between pedal and crank can be adjusted and the resistance knob indicates the level selected.

Because the Saehan Cycle - Clinical is a product aimed at professionals, we offer various accessories to increase its flexibility and user's safety. Be aware these do only apply to the clinical cycle, not to the home cycle.

Wheeleo MD CE

Yesterday, you had the choice between a classic cane which is impractical because it is difficult to coordinate, does not help when it is in the air. No one likes having to use it because it highlights their difficulties... Or a rollator which requires two hands to use it, which stigmatizes as much as the cane, which is cumbersome and not easy to handle, let alone indoors (try walking through a door with a rollator!). Therefore, the walker is parked at the entrance of the house or apartment and leaves its user without help.
Now there is the Wheeleo.
Reduced mobility presents 3 challenges:

- Keep the person moving;
- Reduce the risk of falling;
- Loss of autonomy.

Wheeleo, the rolling cane, is designed to offer a solution to these 3 challenges and offers additional benefits:

- Ease of handling, no special training required;
- **Walking** goes a lot **faster** than with a quadripod cane;
- **Safer walking** than with a quadripod cane, as there is constant ground contact;
- **One-handed use** while still maintaining constant ground contact, the other hand can be used to move an object, to open doors, ...
- **Minimal space required** and perfect for indoor use where a rollator is too big.
- **Reinforced stability**: the wheels offer a security system. A lateral push will result in a lateral movement, not a tilting/fall.

Wheeleo is a unique quadripod rolling cane used to improve mobility. It is designed with the aim of offering help without stigmatising the disability of its user.

It will make walking trips smoother and safer which will allow the user to maintain or **improve autonomy**.

The Wheeleo is used with one hand. Thanks to its 4 wheels, you do not have to lift it, which improves stability and **reduces the risk of falling**.

The Wheeleo is super easy to use. Ultra-intuitive, its user will always position it in the right place to guarantee its stability and balance.

An important feature of the Wheeleo is that it **does not require brakes** to prevent its user from falling. Thanks to its rolling design, the Wheeleo will always be placed in the right position for its user.
When losing balance, the user will automatically push the Wheeleo in the right position that is comfortable for him, without lifting the Wheeleo.
Adding brakes would be the same as replacing the Wheeleo with a regular cane because the brakes would block the wheels. As a consequence the Wheeleo would tilt and its user would possibly fall.

MoVeS Wooden Incline Board MD CE

The incline board increases extension in the lower and upper back while stretching the calves.
It can be used:

- to improve the general posture,
- to stretch the calf muscles of athletes, football players and sportspersons in general,
- to stretch the upper-leg muscles (Ischias),
- to increase extension in the lower and upper back.

MoVeS Wooden Incline Board - Ladder

The MoVeS Wooden Incline Board - Ladder is made out of natural birch wood and is very resistant. It is adjustable in 4 different angles (10°, 15°, 20° and 25°). After using the MoVeS Wooden Incline board, it can easily be folded to achieve its compact form when not in use

Triggerpoint Rollers

Massage rollers are used to put pressure on the muscles' triggerpoints and to loosen the tension in the muscles. Trigger points are often the cause of different pains.

Spiky Foam Roller

↕ 33cm
Ø 13cm

The Mambo Max Spiky Foam Roller is designed for deeper massage & acupressure therapy. The spikes make it possible to get deeper into the muscles to relieve tension and soreness and to improve mobility. It also has a bi-directional zone for comfort when rolling along the spine. The Spiky Foam Roller is mainly used for stretching, self-massage, body support and stability exercises.

Hollow Foam Roller

The Mambo Max Hollow Foam Roller can easily help people who are experiencing long term pains. Its three-dimensional pattern with different shapes replicates the massage from a therapist's hands. The larger surfaces allow a superficial massage while the smaller shapes are designed for a deeper massage.

↔ 33cm
Ø 14cm

Ergonomic Foam Roller

↔ 33cm
Ø 15cm

The Mambo Max Ergonomic Foam Roller is a curved hollow foam roller, which enables more exercises. Except rolling back and forth, it's possible to make sideways movements. More muscles will be addressed through which the body will be toned even more. The soft foam in combination with the nipples is perfect for trigger point massages. The central groove will reduce pressure on the spine.

3-in-1 Foam roller

The Mambo Max 3-in-1 foam roller combines 3 different foam rollers in one package. Thanks to its smooth surface, the outer part is perfect for a superficial massage. The second part has grooves which can be used for a deeper massage and to exercise higher pressure on the trigger points. Finally, with the inner massage stick it's possible to exercise high pressure on sore muscles to improve blood circulation and the muscles' recovery time. This last item is available as a separate product too: The Mambo Max Massage Stick.

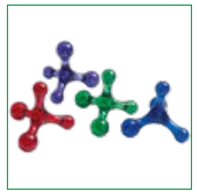
Massage Tools CE

The Knobble® II massage tool is made of durable polymer with a band of non-latex. The Knobble® II gives your hand more power when you need it. Use either the tip or the base for applying pressure on yourself or others. The Knobble® II doesn't replace your healing hands, it just helps them do more and last longer.



The Jacknobber® II massage tool can be used in many ways to apply deep pressure to myofascial trigger points and areas of muscle tension. The smaller knobs provide more intense pressure while the larger knobs provide a more diffuse pressure. Use one knob at a time to press deeply into taut bands with embedded trigger points; use two knobs at a time on either side of the spine.

The Index Knobber® II massage tool is a simple device designed to let you apply deep pressure to muscles within easy reach of your hand. It is the ideal instrument for clinic or home use allowing for firm, sustained pressure on targeted muscle. It's unique design allows it to be used in several hand positions and by the right or left hands comfortably and interchangeably.

The Palmassager™ is one of the most efficient massage therapy aids available anywhere. Hold it firmly in the palm of the hand and use one, two or three of its round knobs to massage sore muscles. It is used for back, shoulder, arms and legs.

The Backnobber® II massage tool is allows the user to apply as much pain-releasing pressure as long as required to achieve remarkable effects. A locking mechanism allows it to come apart for convenient travel and storage.

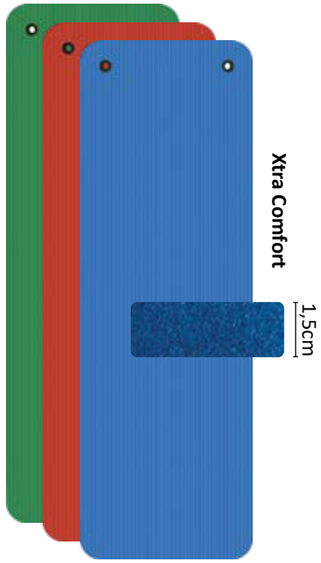
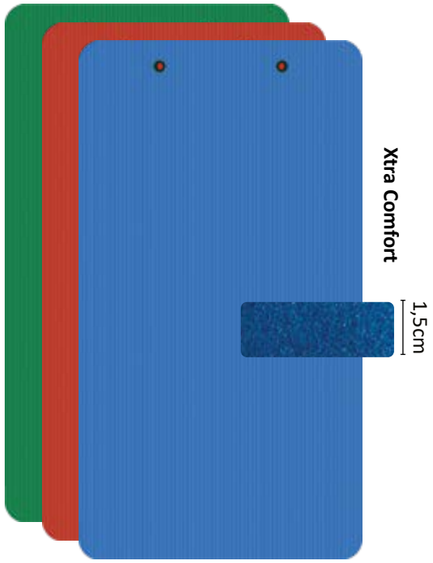
Xtra Comfort Gym Mat
180 x 60 x 1,5 (cm)



Xtra Comfort Gym Mat
180 x 100 x 1,5 (cm)



Latex-free

The Mambo Max Gym Mats provide a soft touch and comfortable exercise environment. They are perfect for gym & fitness. Non-slip, well-cushioned surface with a unique closed cell structure. The mats are equipped with plastic rings 40cm apart so they can be suspended while not in use. Each mat comes with a handy storage/carry strap.

The Comfort Gym Mat comes in 3 popular colours: black, blue and magenta. Our well-known 1,5cm-thick exercise mats are now called 'Xtra Comfort Gym Mat' to highlight the extra comfort they offer compared to thinner mats. They continue to be available in widths of 60cm and 100cm in blue, red and green.

With rings
and carry strap.

The Mambo Max Gym Mat
Hanger holds up to 10 mats.
Distance between bars is 40cm.

Aerobic Step CE

Step aerobics is a form of aerobics that is practised worldwide by millions of people. The reason for its popularity is simple, it offers a great cardio workout without the need for extensive space or equipment.
While the aim of aerobics is to increase the body's consumption of oxygen, step aerobics builds on that goal by offering a more intense workout. The Mambo Max Aerobic Step provides this extra boost by incorporating the action of stepping onto the platform to intensify the workout. It is low impact, and doesn't stress the joints as much as running or jogging.

Fabric Elastic Band CE

The Mambo Max Fabric Elastic Band consists of 10 consecutive loops. This great toning and work-out tool is suitable for early training up to professional athletes. Three different resistances are available, while the 10 consecutive loops allow you to spice things up. Physical training can be intensified by using a lower amount of consecutive loops resulting in a higher resistance.

↔ total: 120cm
loop: 11,5cm

The Mambo Max Fabric Elastic Band is durable and extremely versatile. It can be used for stretching, toning or even as an alternative for dumbbells as a weight training accessory. The progressive resistance offers you a broad range of exercises.

Wooden Balance Boards

The Mambo Max Wooden Balance Board is your perfect partner if you want to improve your balance on an ecologic and high-end product. The Wooden Balance board is available in 3 versions: Uni-Directional, Standard & Sport. Their different form and balance point make it possible to have 3 products with a very different character and level of difficulty.

Children and elderly could experience a balance board with pivot point as too challenging. The Uni-directional Balance Board offers more confidence. This enables the user to improve body stability without the fear of falling.

A Uni-directional Balance Board offers a more predictable training as it can only pivot in one direction. When turning the Balance board upside-down, the arches can be used as push-up grips. Once the user is ready for the next level of training, the Balance Board Rehab or Sport are ideal next steps in the process.

The Balance Board Standard is lower than the Balance Board Sport. In addition with its smoother pivot point, it reacts completely different than the Sport. It's a great middle step between the Balance Board Uni-Directional and Balance Board Sport.

The most challenging Balance Board is our Sport version, which, as the name specifies, makes it a real sport. Finding your balance and avoiding the edges touching the ground is hard and requires you to use all your muscles in your body. It's a great and fun way to exercise a full-body workout.

AB Gym Ball

ANTI-BURST

350kg
Yes, 350 kg!!!

The Mambo Max AB (Anti-Burst) Gym Ball increases flexibility, improves strength, fitness and posture. Exercising with this ball also enhances your balance and coordination. All AB Gym Balls are Anti-Burst: if the ball gets punctured by a sharp object the ball won't burst, thus reducing risk of injury.

This extremely durable Mambo Max AB Gym Ball comes in a Mambo Max cardboard retail pack, including AB Gym Ball, Faster Blaster Pump, Exercise Chart, Plug and Plug Remover.

The Mambo Max AB Gym Ball is also available in the value pack:
a polybag containing only the ball and plug.

Value Pack

Ecofriendly pvc. Heavy metal content in compliance with EN 71 Standards.
Phthalates content meets EU-directive 2005/84/EC.

AB Peanut Ball

ANTI-BURST

The Mambo Max AB (Anti-Burst) Peanut ball helps users who struggle with the instability of a regular gym ball. The peanut shape offers extra sideway stability, which gives more confidence to start working out with Gym Balls.

Faster Blaster Pump

150kg

The Mambo Max AB Peanut Ball offers a more predictable therapy or fitness training as it can only roll in one direction. This certainly is a huge benefit for children, elderly or people who suffered an injury. In addition, Peanut Balls are very popular amongst pregnant women and are very helpful devices during labour.

Similar to our regular Mambo Max AB Gym Ball, the Peanut Ball is
Anti-Burst: if the ball gets punctured by a sharp object the ball won't burst, thus reducing risk of injury.

The Mambo Max AB Peanut Ball comes in a Mambo Max cardboard retail pack, including Faster Blaster Pump and Plug.

Balance Pad Pro

This balance pad is a great training tool to improve your balance, stability, flexibility, strength and motor skills. The Balance Pad Pro creates more instability than our regular Balance Pad, so you constantly need to correct body posture, making the excercises just that bit tougher. This new balance pad is made out of PU-material instead of EVA-foam, which makes it more durable and less prone to small damages.

Medicine Ball CE

A medicine ball (also known as an exercise ball, a med ball, or a fitness ball) is often used for strength training as it plays an important role in the field of sports medicine. Medicine ball training is one of the oldest forms of strength and conditioning training – the first reference to wrestlers training with sand filled bladders appears in Persia nearly 3000 years ago. In ancient Greece the physician Hippocrates had his patients throw them back and forth for injury prevention.

Para Pro - Paraffin Bath CE

The Para Pro is a professional paraffin wax heating bath which is made to be used on 220/230 Volt power sockets and which can be used 24/7. In combination with our premium paraffin pearls it only needs between 2 and 3 hours to completely melt 2,5kg of paraffin. The temperature is adjustable from 40-60°C and is easy to control due to the digital thermometer.

When ordering the Para Pro, you receive 2,5kg of white paraffin pearls or 6 blocks (2,72kg) of Tea Tree Green Paraffin free of charge.

Para Pro Specifications:

- Outer dimensions: 39cm x 25cm x 18cm (l x w x h)
- Inner dimensions: 32,5cm x 18cm x 13cm (l x w x h)
- Weight: 3,1kg
- 220 V: No transformer needed, which will lengthen the durability.
- Low power consumption once the paraffin has melted
- 24-hours a day fully operational
- **Fast melting between 2 - 3 hours!**
- Adjustable temperature (**40 - 60°C**)
- Digital thermometer

Paraffin Blocks:

- Green fully refined paraffin wax
- Melting point: 46°C
- Tea Tree scented

Paraffin Pearls:

- White fully refined paraffin wax
- Congealing point: 53°C
- Melting point: +/- 54°C
- Meets the purity requirements of BGA1, Ph.EUR.2 and FDA3

1. Bundesgesundheitsamt recommendation No. XXV B II;
2. European Pharmacopoeia, current edition;
3. Food and Drug Administration, § 172.886 Petroleum Wax

PearlPack MD CE

PearlPacks are reusable Hot/Cold Packs filled with small pearls. Hot and Cold Therapy can be applied to relieve pain and inflammations associated with muscle strain and sprain. This dual applicability makes them a strong alternative to ordinary heating pillows and ice packs. The small pearls absorb heat or cold, which they can retain for 20 minutes. During these 20 minutes, these packs will relieve a part of the pain.

Not only do they look good, the products are very convenient in use. PearlPacks won't feel wet nor drip after freezing or heating them, avoiding a mess. All materials used are non-toxic and odourless.

Besides relieving pain from an injury or muscle strain, hot/cold packs are often used to reduce swelling after an operation. PearlPacks truly are multifunctional products.

PearlPack Knee/Elbow

07-040301

This offers a solution for Hot/Cold therapy on the knee or elbow joints. The large opening ensures that your knee or elbow remains free and can continue to move freely, while the Pearl technology sends direct relief to the pain. The flexible velcro strap keeps the pack firmly in place.

PearlPack Eye Mask

07-041101

This mask adapts to the patient's face and has a fabric strap. Hot treatment can be applied when eyes feel dry or if there's an infection of the eyelid. Cold treatment will help when suffering from headaches, swollen eyes or sinusitis.

PearlPack Back Wrap

07-040201

This large pack divided in 3 segments is equipped with velcro strap. It fits perfectly around the patient's waist for an optimal pain relief on the back. The pearls can be pushed from one segment to the other if one area of the back needs less or more thermal treatment.

PearlPack Sports Pack + strap

07-040102

The Pearl Pack Sport pack is updated and now comes with a velcro strap.

Roll-On Pack MD CE

MoVeS Roll-On packs combine hot/cold treatment with practicality. The tubular shape and flexible material allow an easy roll-on application, even after being heated or frozen. The various sizes will fit perfectly over finger, wrist, ankle or knee. This design ensures that the whole area will benefit from the hot or cold treatment.

From the same factory as the original Torex® products. Reusable, non-toxic and latex free. Available in 5 sizes.

Hot/Cold Pack MD CE

The MoVeS Hot/Cold Packs are usable for hot as well as cold therapy. This dual applicability makes them a strong alternative to ordinary heating pillows and ice packs. The versatile, reusable packs deliver hot and cold therapy effectively and economically. The use of the MoVeS Hot/Cold Pack is unlimited and its material is non-toxic. Even below -20°C it remains soft. The MoVeS Hot/Cold Pack can be bent in any angle, allowing maximum coverage of joint and muscle. All Hot/Cold Packs can be heated in the microwave and can be frozen in the freezer. Temperature holds for approximately 30 minutes.

MoVeS Hot/Cold Pack | Classic - Gel

The classic (and economical) transparent Hot/Cold Pack.
The special gel is non-toxic and biodegradable.

Sold per 10 pieces

MoVeS Hot/Cold Pack | Standard - Gel

Our standard Hot/Cold Pack is a nylon covered gelpack. The special gel is non-toxic and biodegradable.

Sold per 10 pieces

MoVeS Hot/Cold Pack | Soft Touch - Clay

The Soft Touch is improved with a more user friendly surface. The frost-free surface allows usage in direct contact with the skin. Filled with clay, a 100% natural product.

Sold per 10 pieces

Protection sleeve

100% polyester Protection Sleeve for hot/cold packs. Machine washable. Available in 3 sizes.

07-010206: XXL Hot/Cold Pack

This is ideal for pain relief on shoulders and back and has a nylon cover.

Sold per single piece.

07-010311: Tri-Sectional Hot/Cold Pack

Sold per 10 pieces.

Infrared Thermometer MD CE

Ear & Forehead Thermometer

The infrared thermometer is used for measuring body temperature by two-in-one functions: Ear and Forehead temperature. It is suitable for medical unit and home use.

- Fast and easy temperature measurement by advanced infrared technology
- Range between 34.0°C~43.0°C
  Accuracy; <35.0°C and >42.0°C = ±0.3°C
  35.0°C~42.0°C = ±0.2°C
- Tri-colour backlit;
  - <37.4°C = Green
  - 37.4°C~38.0°C = Yellow
  - >38.0°C = Red
- Memory mode
- Suitable for both infants and adults
- Easy operating and cleaning
- Automatic power off after 60 seconds
- 2 AAA alkaline batteries

Shotgun Thermometer

Measures your body temperature without direct contact with the skin. Can measure between 5-15 cm from the skin.

- Detailed 34 memories with time/date
- Response time: 1 second
- Effective distance: 5-15cm
- User guidance by infrared beam
- Fever alarm

3-colour backlit

08-070303	Infrared Thermometer |Shotgun | Forehead auto-sensing | 2 x AAA	1 pc

Blood Pressure Monitor MD CE

The blood pressure monitor is used for measuring blood pressure and pulse rate.
It is suitable for people older than 12 years.

Features:

- Large LCD display: 72mm x 43,5mm
- 2 users, 99 memories per user
- Irregular heart beating sign
- Indicating blood pressure level in 4 colours
- Average of last 3 records
- Low power detection
- Over pressure protection
- Automatic switch-off

Reference	Description	Unit
08-070501	Blood Pressure Monitor + Cuff	1 pc

Available early 2022

Fingertip Pulse Oximeter MD CE

A Pulse Oximeter is a very important and common device to check patient blood-oxygen saturation (SpO_2) level and pulse rate. As a small, compact, simple, reliable and durable physiological monitoring device, Fingertip Pulse Oximeter greatly enhances patient care.

08-070201

Adult Oximeter

Features:

- Dual colour OLED displays SpO_2, PR, pulse bar and waveform
- SpO_2; measurement range between 70%~99%
  Accuracy; ±2% on the stage of 80%~99%
- PR; measurement range between 30BPM~240BPM
  Accuracy; ±1BPM or ±1% (the larger one)
- Low power indicator
- 6 display modes with adjustable brightness
- Automatically power off
- AAA alkaline batteries

Junior Oximeter

Rechargeable oximeter with OLED-screen, specifically designed for kids from 3-12 years old.

- Rechargeable via USB-cable
- Dual colour OLED displays SpO_2, PR, pulse bar and waveform
- 4-direction & 6-mode display for convenient readings
- Set-up alarm range of SpO_2 and pulse rate
- Menu-function setting (beep sounds, etc.)
- Lithium battery; automatically power off
- Gravity function, automatic rotating reading option

Hydraulic 3-piece hand evaluation kit

Portable carrying case contains all instruments necessary to evaluate the strength and range-of-motion of the hand and fingers.
Set includes:

- hydraulic hand dynamometer
- hydraulic pinch gauge
- stainless steel finger goniometer 15cm - 180° per 5°

Quality Hard Case Box

Reference	Description	Unit
08-010113	Saehan Hydraulic Hand Evaluation Kit | 3 pieces	Set

Hydraulic 7-piece hand evaluation kit

Portable carrying case contains all instruments necessary to evaluate the strength and range-of-motion of the hand and fingers.
Set includes:

- hydraulic hand dynamometer
- hydraulic pinch gauge
- stainless steel finger goniometer 15cm - 180° per 5°
- 2-point discriminator with 3rd point
- Wartenberg pinwheel
- finger gauge
- functional finger motion gauge

Quality Hard Case Box

08-010117	Saehan Hydraulic Hand Evaluation Kit | 7 pieces	Set

Hydraulic hand dynamometer

The Hydraulic Hand Dynamometer gives accurate grip strength readings without the patient being able to "feel" the handle move. The adjustable handle has 5 positions to accommodate to any hand size. The indicator remains at the patient's maximum reading until it is reset. Has a scale in kilograms. Comes in a hard carrying case.

Range: 0 - 90kg (200lb)

Quality Hard Case Box

Reference	Description	Unit
08-010101	Saehan Hydraulic Hand Dynamometer	1 pc

Digital hand dynamometer with Data Transfer Software- DHD-1

Designed for reliable grip-force evaluations from 0 to 90kg (200lb). It has an easy-to-read LCD display. This hand dynamometer features an electronic zero calibration system and up to 40 test data can be stored in memory. It is powered by a rechargeable Li-Ion polymer battery and data will not be lost when changing the battery. The Data Transfer Software can
transfer the test results into .txt-files, which can be easily accessed using Notepad or MS-Word for editing and printing.

This Digital Hand Dynamometer hard carrying case includes a Digital Hand Dynamometer, the DTS-software and a USB cable.

Range: 0 - 90kg (200lb)

Quality Hard Case Box

Reference	Description	Unit
08-010201	Saehan Digital Hand Dynamometer - DHD-1	1 pc

Digital hand dynamometer with G-STAR™ Software - DHD-3

The DHD-3 Digital Hand Dynamometer (SH1003) provides the same features as the DHD-1 when used as a stand-alone device, but adds automated Rapid Exchange Grip Testing. Using Auto Mode, up to 10 strength tests for each hand as well as the time allowed to switch hands can be configured to automate the testing procedure.

The Grip Strength Testing and Research (G-STAR) is an easy to use software tool which automates grip strength testing and endurance testing in both clinical and research environments.
All patient information and their test results are stored in an Access database.

Quality Hard Case Box

Range: 0 - 90kg (200lb) / Minimum requirements: Windows XP + USB port

Reference	Description	Unit

Smedley Hand Dynamometer CE

Ergonomic Handle

The Smedley spring-type Dynamometer has been successfully used for many years to measure grip strength. The ergonomic handle is adjustable to fit all hand sizes.
Unit is calibrated in kilograms and pounds. Stored in a soft carrying case.

Quality Soft Pouch Case

Range: 0 - 100kg (220lb)

Reference	Description	Unit
08-010401	Saehan Smedley Hand Dynamometer - Ergonomic Handle	1 pc

Push-Pull Dynamometer MD CE

A simple, easy-to-use, ergonomically designed instrument that objectively measures push, pull and lift forces for manual muscle testing, functional capacity evaluation and job task evaluation at a remarkably affordable price. Because the instrument is lightweight, small and portable, you can perform precise, objective evaluations in your practice or at the patient's location. The easy-to-attach dual grip handle can be used when measuring larger forces.

Lift platform and chain to perform lifting evaluation not included.

Dual Grip

Range: 0 - 45kg (100lb)

Quality Hard Case Box

Reference	Description	Unit
08-010501	Baseline Hydraulic Push-Pull Dynamometer	1 pc
08-010502	Dual Grip for Push-Pull Dynamometer	1 pc

Body Fat Scale MD CE

Baseline body fat scale is made with tempered glass. This scale measures weight, body fat and water % and memorises data up to 8 persons. Measurements range from 4% - 45% body fat; 37.8% - 66% body water and 330lb/150kg weight capacity. The required 1 x 3V battery is included.

Resolution:
- 0.1% bodyfat
- 0.1% water

Dimensions: 35cm x 35cm x 6cm
Product weight: 2kg

Reference	Description	Unit
08-070101	Baseline BMI Body Fat Scale	1 pc

Pinch Gauge CE

08-020102: Mechanical Pinch Gauge

Used for hand-strength testing by measuring tip, key and palmar pinch force. Made of durable painted stainless steel. Mechanical properties will not degrade over time. It can serve as a diagnostic tool or for monitoring the progress of rehabilitation.

08-020102

Quality Soft Pouch Case

Range:
0 - 20kg (45lb)

08-020101: Hydraulic Pinch Gauge

Uses the improved hydraulic system of the hand dynamometer to assure convenience, product reliability, measurement accuracy and repeatability. This results in a more accurate test result for all pinch tests.

08-020101

Reference	Description	Unit
08-020101	Saehan Hydraulic Pinch Gauge	1 pc
08-020102	Saehan Mechanical Pinch Gauge	1 pc

Squeeze Dynamometer CE

Quality Soft Pouch Case

The Squeeze (bulb) Dynamometer is the inexpensive device to reliably measure hand and finger strength. The dynamometer has an indicator dial that remains at the maximum reading until reset. Unit is calibrated in pounds and kilograms.

Range: 0 - 70kg (150lb)

Reference	Description	Unit
08-010301	Saehan Squeeze Dynamometer | 70kg	1 pc

Back-Leg-Chest Dynamometer CE

Measure strength of back, leg and chest. Base provides secure footing. Chain length is adjustable to accommodate for height differences or to vary the point of force application. Shows pounds and kilograms. Pointer remains at maximum until reset. Comes fully assembled with 1,5m chain.
Range: 0 - 300kg (660lb)

Reference	Description	Unit
08-010601	Saehan Back-Leg-Chest Dynamometer	1 pc

Fat Caliper CE

08-040101

Professional light-weight aluminium caliper. Measurement arms with floating tips to assure accurate and reproducible results. 65mm scale is large and easy to read. Corrective scale for sex and age included in multilingual manual.

- Professional, very accurate unit with spring loaded levers and low-pressure bearings for constant pressure.
- Scale permits reading up to 65mm
- Aluminium casted to insure years of reliable use.
- Includes carrying case
- CE marked and FDA approved

Quality Soft Pouch Case

SAEHAN®

The Plastic Skinfold Caliper from Baseline is the inexpensive alternative for skinfold analysis. Spring loaded arm assures reproducible "pinch". Read directly from the 50mm scale. Ideal instrument for screening large population. The Plastic Skinfold Caliper comes with a booklet and tables.

Inclinometer MD CE

Baseline's Bubble and Digital Inclinometers are used to measure range-of-motion (ROM).

Some neck and back measurement protocols require the simultaneous use of 2 inclinometers.

Quality Hard Case Box

Reference	Description	Unit
08-060101	Baseline Bubble Inclinometer	1 pc
08-060201	Baseline Digital Inclinometer	1 pc

Scoliometer MD CE

Scoliometers are inclinometers designed to measure trunk asymmetry or Angle of Truncal Rotation (ATR) used in scoliosis screening programmes. They are small, non-invasive devices which are placed over the spine while a person is in a forward bending position. The scoliometer reading indicates degree of trunk asymmetry (rotation). Research shows that most people have a small degree of spinal rotation. However, depending on the measurement, spinal rotation is a possible indicator that scoliosis may be present.

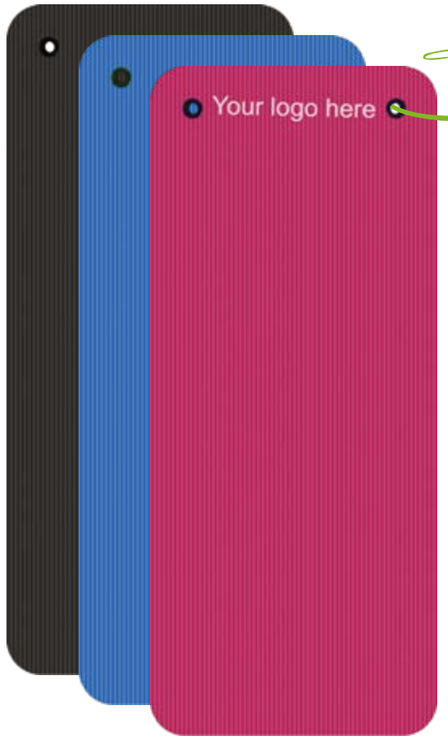
PRIVATE LABEL

We have nice products, but you would like your own brand or your customer's name on the band, loop, superloop...? We'll do it!
Together with our manufacturers from all the products in our range, we can create your desired product with the look you want. We can replace our logo with yours, change the colour, even the packaging can be tweaked to your needs. Private Labels will allow you to design the product the way you want to match it to your company's or customer's identity.



Private Label products have the same quality as all our products, but are putting your brand in the spotlights. This is perfect if you need a homogeneous range of products or want to increase your brand awareness. Or maybe you're looking for a one time opportunity: a promotional product during your company's special occasion, a gift for visitors or an event you're supporting?

Please contact us for more information about pricing and volume.

AFTER-SALES

MVS IN MOTION CALIBRATION SERVICE

Measurement Instruments are calibrated at manufacturing with a full one year guarantee, before sending them to users all over the world. Ideally, these instruments should be recalibrated every year.

In order to make this happen in an easy and inexpensive way, Hydraulic Hand Dynamometers (Saehan, Jamar, Baseline...) and Hydraulic Pinch Gauges are recalibrated by our experts at the MVS In Motion Centre in Tisselt - Belgium. This operation consists of re-establishing the exact relationship between the force applied to a dynamometer and the measurement it shows. Small repairs can be done as well.

Simply send your request to our customer service department for a return authorisation. After each recalibration, you will receive an updated calibration certificate, certifying accurate and repeatable test results.

If you have many calibrations to do, you might consider buying your own calibration unit.

MVS IN MOTION REPAIR CENTRE

Since machines are designed and assembled by humans, they are not flawless. That is why MVS In Motion installed an inhouse repair centre, to swiftly and correctly solve any problems that may occur with our products.

No matter what the cause, be it faulty fabrication or misuse, our technician will shine his light on the problem.

Send an email to our customer service department to inform us on the type of problem and the serial number/ production date of the device. After our authorisation, please send over the patient, accompanied by your name and client number and a brief description of the symptoms to info@mvs-in-motion.com. We'll do our best to have him cured in no time.

Like everything in life, all pictures in this catalogue are momentary representations. If changes are being made to products during the time this catalogue is being distributed, we are unable to adjust the pictures.

TERMS & CONDITIONS

1. Terms: Prepayment, unless otherwise specified. Buyer should bear all bank charges.

2. Minimum purchase value: An administration fee of €10,00 will be added on all orders below the minimum purchase value of €250,00.

3. Freight Terms: Prices are ex-works Tisselt, Belgium. All shipping/delivery costs are at charge of the buyer, unless otherwise specified. Visible damage to goods delivered, not duly noted on the consignment note of the carrier, cannot be compensated in any form.

4. Prices: All prices for merchandise purchased are based on seller's price list in effect on the time of the order. Prices can be subject to change without notice.

5. Claims: Unless otherwise provided for herein, claims of any kind in goods sold by seller shall be made by buyer to seller, in writing, within a period of seven days after such goods are delivered to buyer.

6. Credit and Exchange: Written authorisation must be obtained before returning merchandise for credit or exchange! Prior to return, buyer shall furnish seller an itemized inventory of the products to be returned, and any other information seller may request, such as product lot number, manufacturing date, expiration date, ... In no event shall seller accept products for return more than thirty (30) days after delivery by seller to buyer and products which are damaged, used or not in their original and unopened packaging. Seller will charge a handling fee of ten percent (10%) of the returned goods.

7. Finance Charge: A finance charge of 1% per month (12 % per annum) will be added to all amounts past due. A penalty of 15% on value, with a minimum of €40,00, for late payment will be added. Terms of payment are from date seller's invoice and not contingent upon delivery.

8. Governing Law: All disputes arising out of all sales by seller to buyer shall be governed by the laws of Belgium and place of jurisdiction is Antwerp, section Mechelen.

9. Warranties: Seller warrants that it has good title to the goods purchased by buyer and that its goods will conform to buyer's specifications, if any, except as otherwise provided herein. All other warranties, whether express or implied, and including, but not limited to, the warranty of merchantability and fitness for a particular purpose are excluded. In all events, buyer's sole and exclusive remedy shall be limited to the amount of the purchase price of any product on which a claim is made as its exclusive remedy for breach of the warranty expressed herein and for negligence and otherwise. Seller reserves the right to repair or replace warranted products in its descretion. Under no circumstances shall seller be liable to buyer or any other person for consequential or incidental damages.

10. Property: Seller has the exclusive property on the delivered products until buyer has paid the full amount due. This also implies that if buyer does not pay in time, seller has the right to, without prenotice, claim back the delivered goods.
