ED STUDY NOW AVAILABLE AT PUBMED

The study-abstract of the Motil working group regarding ED treatment with PiezoWave2 is now available in one of the largest study databases

PubMed is a free search engine accessing primarily the MEDLINE database of references and abstracts on life sciences and biomedical topics. The United States National Library of Medicine (NLM) at the National Institutes of Health maintain the database as part of the Entrez system of information retrieval. PubMed comprises more than 30 million citations for biomedical literature from MEDLINE, life science journals, and online books.

The screenshot shows a PubMed search result for the study: "Erectile Dysfunction Treatment Using Focused Linear Low-Intensity Extracorporeal Shockwaves: Single-Blind, Sham-Controlled, Randomized Clinical Trial." The abstract is visible, detailing the study's introduction, methods, results, and conclusions. The results section states: "A statistically significant difference between the groups was found at 4 and 12 weeks after treatment with regard to the quality of erection as measured by the IIEF-5 (p = 0.049 and p < 0.001, respectively), the EHS after week 12 (p < 0.001), an increase in the EHS after 4 and 12 weeks (p = 0.030 and p < 0.001, respectively), after 12 weeks in GAG (p < 0.001), SEP 2 (p = 0.05), SEP 3 (p < 0.001), and patient's satisfaction (p < 0.001) and partner's satisfaction (p < 0.001)." The study was published in 2019 in the journal "Sex Medicine".
